

Marking Services Canada Ltd.

## Stainless Steel Conduit & Cable Markers

Marking Services Canada (MSC) offers stainless steel markers for the permanent identification of cable, conduit and equipment in a wide variety of environments. Stainless steel conduit and cable markers communicate the presence of potential hazards and other essential information vital to employee safety. Manufactured from type 316 stainless steel, our conduit and cable markers are ideal for highly corrosive environments including marine, chemical or high heat.

Unlike traditional stamped or engraved tags with black-filled text, MSC high performance stainless steel conduit and cable markers feature engraved text that is virtually impossible to remove with solvents or heat. MSC stainless steel markers are strapped onto cable using plastic or stainless steel cable ties making installation quick and efficient.

- Printed on #316 high performance stainless steel
- Standard color is black text on stainless steel background
- Matte finish with rounded corners
- ½" slot at each end for plastic or stainless steel strapping
- Text height sized to fit within tag boundary or comply with specified height
- Standard Thickness: 0.029" (0.736 mm)
- Standard Heights: 0.375" (9.525 mm), 0.5" (12.7 mm), 0.75" (19.05 mm) or 1" (25.4 mm)
- Service temperature: 500° F (260° C)
- Provides maximum resistance to solvents and heat

Marking Services Canada improves and standardizes the identification of hazards and components to promote safer work environments and minimize downtime due to errors or accidents. We provide a full complement of identification products designed to fulfill identification needs in nearly any environment.

Through our commitment to providing value-added services, high-quality products and on-time delivery, MSC offers you a one-stop, comprehensive source for all your identification needs.
