MS-900 Self-Adhesive Markers

Marking Services Canada (MSC) offers MS-900 self-adhesive markers as an economical and easy way to mark pipes and ducts/equipment. Our self-adhesive markers are made from durable vinyl material suitable for line marking identification and system color coding.

Why spend hours fiddling with tape and typing each system into a small label maker to print markers one at a time? MS-900 markers comply with ASME (ANSI) and CAN/CGSB standards, have an industrial grade adhesive and are easy to install. Simply clean and dry the pipe, remove the marker from the coated paper backing and place in the desired location.

- Highly visible color-coded labels make it easy to differentiate between systems
- Printed on premium-quality, fade-resistant vinyl with durable, industrial grade adhesive
- Adheres well to pipe and insulation with only limited surface preparation
- Legend markers can be used with arrow tape or separate arrow markers to indicate flow direction
- All standard markers comply with the ASME A13.1 "Scheme for the Identification of Piping Systems" standard when coupled with arrow tape
- Fast turnaround with off-the-shelf delivery on stock legends
- No minimum order quantity
- Wide variety of standard colors available
- Markers can be customized to designate the specific system, service or point of origin

Standard sizes and colors – additional sizes available upon request

Style Marker	Pipe Diameter (including insulation)	Marker Size	Letter Size
A	3/4" - 2 1/4"	1" x 8"	3/4"
B	2 1/2" - 7 7/8"	2 1/4" x 13"	1 3/4"
C	8" - 10"	4" x 24"	2 1/2"
D	Over 10"	4" x 32"	3 1/2"

*Directional flow arrow tape is available in roll sizes of 1", 2" & 4" wide by 30 yards long.

Current 2007 ANSI/ASME A13.1 Standards		
Classification	Color Scheme	
Defined Applications		
Fire quenching liquids	White text on red	Sample
Toxic and corrosive fluids	Black text on orange	Sample
Flammable fluids	Black text on yellow	Sample
Combustible fluids	White text on brown	Sample
Potable, cooling, boiler feed and other water	White text on green	Sample
Compressed air	White text on blue	Sample
Undefined Applications		
Defined by user	White text on purple	Sample
Defined by user	Black text on white	Sample
Defined by user	White text on gray	Sample
Defined by user	White text on black	Sample

*ASME (ANSI) A13.1 (1996) spec colors available

Marking Services Canada improves and standardizes the identification of hazards and components to promote safer work environments and minimize downtime due to errors or accidents. We provide a full complement of identification products designed to fulfill identification needs in nearly any environment. Through our commitment to providing value-added services, high-quality products and on-time delivery, MSC offers you a one-stop, comprehensive source for all your identification needs.
