

Your Single Source for Asset Identification

ENGINEERING ➡ BOM ➡ MANUFACTURING ➡ INFORMATION
➡ IMPLEMENTATION ➡ ENHANCED WITH MOBILE TECHNOLOGY

MSI's Asset Identification Products and Services

Marking Services improves and standardizes the identification of hazards and components to promote safer work environments and minimize downtime due to errors or accidents. MSI organizes the critical elements of each plant's unique asset information, developing specific design, engineering, material fabrication and installation methods on major construction projects as well as existing plants.

A single point of responsibility for the implementation of all pipe labeling, valve tagging, and equipment identification, we help our customers manage their facilities better; achieving long-term cost savings associated with faster, more efficient plant commission and start-ups, improved operator training, and enhanced plant safety for employees. Through our commitment to providing value-added services, high-quality products and on-time delivery, MSI offers you a one-stop, comprehensive source for all your identification needs.

Bring Your Safety Check and Audit Process into the Future, Today!

AIM Forms Module within the AIM Mobile Technology platform allows operators and managers to communicate more effectively.

AIM Forms delivers critical information

Efficient, reliable means of making observations and collecting critical operations information

MSI can design and engineer forms to meet any application or content requirement. AIM Forms allows plant operators to engage with interactive forms, accessed via AIM Mobile Technology. Using a smart device, simply scan the equipment sign's QR code, select the appropriate form and begin to document field observations.

- Access via QR coded tags
- Save form as in progress
- Submit form as complete
- Data is automatically directed to your client portal
- Immediate notification of completed form to designated email addresses

Put archaic handwritten forms behind you *MSI will tailor AIM Forms to your unique criteria.*

Using handwritten forms means valuable employees spend time making round after round, filling in paper forms and then filing those forms. Additional time is spent deciphering and keying in all the written data, requiring even more time to transcribe and format for interpretation and use.

Access completed forms anytime, anywhere, 24/7.

AIM Forms puts key operational information in the hands of those that need it.

No more waiting for hard copy forms to be interpreted and entered into a computer, AIM Forms puts important operational information in the hands of those that need it, allowing the ability to transmit critical observations and potential issues to the people who can address the situation without delay.

The data collected using AIM Forms can be exported into a variety of formats including Excel spreadsheets for trending or calculations to make operational decisions. In addition, your client portal provides an archive of information stored chronologically for audit reports and historical reference.
