

## 1/4" THERMOPLASTIC COATED STAINLESS STEEL STRAPPING

Technical Data

### Description

Thermoplastic coated stainless steel strapping is designed for harsh environmental applications where protection against potential galvanic reaction between dissimilar metals is required. The strap is bent back on itself under the stainless steel clip preventing metal contact with the pipe surface. In addition, this material also provides excellent corrosion resistance, is outdoor durable and offers superior resistance to sun, salt, and seawater. It is also flexible, impact and abrasion resistant.

### Physical and Chemical Characteristics

<b>Material:</b>	Type 316 Stainless Steel, uses uncoated clips
<b>Thickness:</b>	.012" (.31 mm) base material .035" (.89 mm) with coating
<b>Size:</b>	100 ft. coils
<b>Service Temperature Range:</b>	-94°F to +160°F (-70°C to +70°C)
<b>Water Resistance:</b>	Excellent
<b>Outdoor Durability:</b>	Excellent
<b>UV Resistance:</b>	Excellent

*Information on physical and chemical characteristics is based on tests we believe to be reliable. The values are intended only as a source of information and are given without guarantee and do not constitute a warranty. Purchasers should independently determine, prior to use, the suitability of this material for their specific application.*
